PROFESSIONAL SUMMARY

Dedicated Full Stack Web Developer with hands-on experience in designing and developing dynamic web applications using HTML, CSS, JSP, Java, and MySQL. Proven ability to build user-friendly interfaces, manage databases efficiently, and deliver high-quality, scalable web solutions. Strong background in problem-solving, system design, and collaborative development. Seeking to leverage technical expertise and creativity to contribute to innovative and impactful software projects.

TECHNICAL SKILLS

Programming Languages

Java, HTML5, CSS3, SQL, JavaScript

Frameworks & Libraries

JSP, Servlets, JDBC, Bootstrap

Databases

MySQL, Database Design

Tools & Technologies

Eclipse, VS Code, Git, Apache Tomcat

Core Competencies

Full Stack Web Development, Problem Solving, System Design, Database Management

PROFESSIONAL EXPERIENCE

Full Stack Developer

April 2024 – September 2024

[Tap Academy]

- Gained hands-on experience in Core Java (JSE), HTML, CSS, and SQL, completing over 250 coding challenges on the TAI platform
- Developed and maintained responsive web applications while optimizing performance and resolvig cross-browser compatibility issues.
- Demonstrated strong troubleshooting and debugging skills to ensure smooth functionality and user experience.
- Collaborated effectively in team-based projects, emphasizing code quality, attention to detail, and adherence to best industry practices.

Web Development Intern

September 2023 - October 2023

[Dhara Global Solutions]

- Developed responsive web applications using HTML, CSS, and JavaScript with focus on user-friendly interfaces
- Collaborated with senior developers to design new features and optimize website performance
- Addressed cross-browser compatibility issues and implemented best practices for web development
- Gained practical experience in troubleshooting, debugging, and development methodologies

KEY PROJECTS

Enhanced Traffic Sign Management System

Technologies Used: Python, Convolutional Neural Networks (CNNs), OpenCV, Text-to-Speech, Voice Interaction

- Developed an automated traffic sign management system using CNNs to detect and recognize 43 categories of traffic signs with high accuracy.
- Integrated text-to-speech and voice interaction features for real-time user engagement and instant information delivery.
- Implemented a live camera feed to provide real-time visual feedback and video streaming during sign detection.
- Enhanced user safety by adding alert and warning mechanisms for critical traffic signs, improving road awareness and response time.

Online Food Delivery Application

Technologies Used: HTML, CSS, JSP, Servlets, Java, JDBC, MySQL, Apache Tomcat

- Developed a dynamic and responsive web application for online food ordering and restaurant management
- Designed an interactive user interface using HTML and CSS to display restaurant listings and manage user cart interactions.
- Implemented user authentication, session management, and real-time order processing using JSP and Servlets.
- Created and integrated a robust backend using JDBC and MySQL, developing DAO classes for efficient CRUD operations on restaurant, menu, and order data.
- Deployed the application on Apache Tomcat through Eclipse IDE, showcasing strong proficiency in Java-based full-stack development.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

December 2020 - May 2024

[Siddharth Institute of Engineering and Technology] | [Puttur,AP]

CERTIFICATIONS

Azure Fundamentals
Microsoft Corporation

TCS National Qualifier Test (NQT)
Tata Consultancy Services

The Joy of Computing Using Python
NPTEL

Problem Solving (Basic) Certificate
HackerRank

Software Engineering Intern Certificate
